

COMP 584 HW3 - Accessibility Findings

Tool used: Chrome Lighthouse

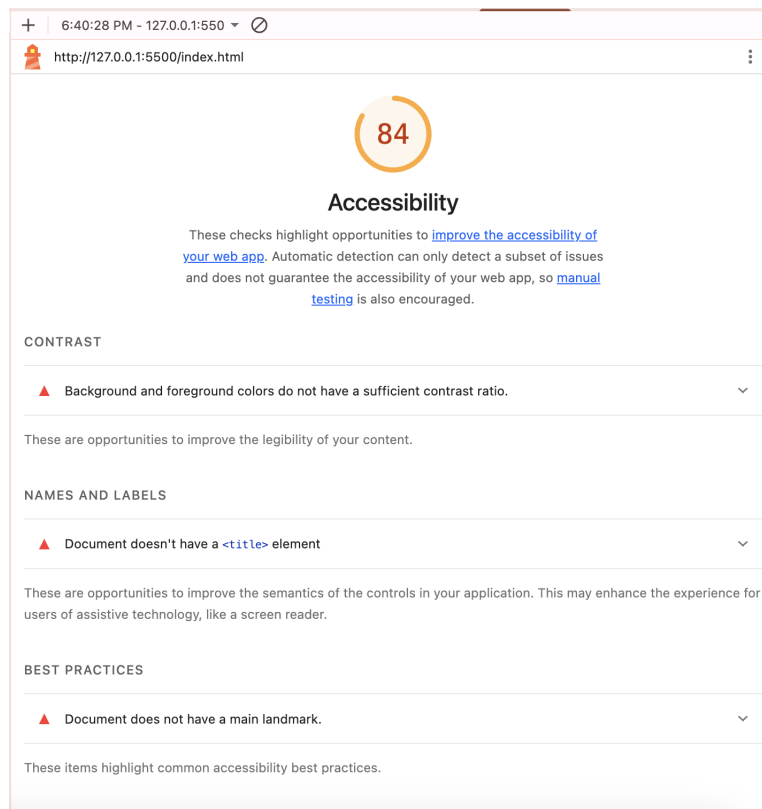

My CS Jobs Weekly Email

Accessibility score: 84

I ran Lighthouse on my email page to see what accessibility problems it could find.

Findings:

- Some background and foreground colors did not have enough contrast.
- The document did not have a title element.
- The page did not have a main landmark.

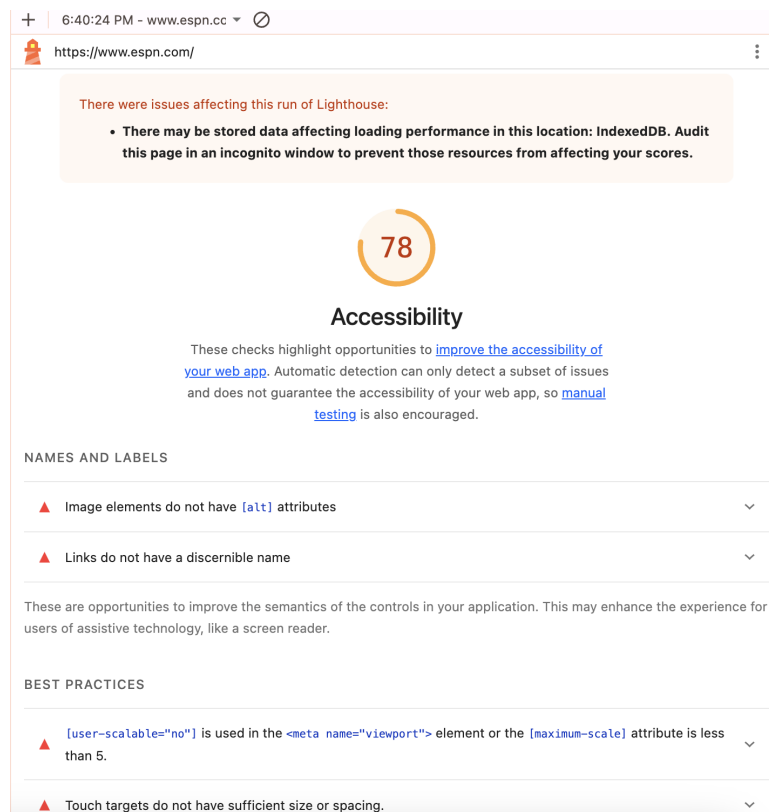

ESPN

Accessibility score: 78

I also tested ESPN to compare my page with a website I use.

Findings:

- Some images were missing alt attributes.
- Some links did not have a clear name.
- Some touch targets did not have enough size or spacing.

Pros / Cons of Lighthouse

Pros

- Easy to use in Chrome.
- Gives a quick score.
- Shows specific problems that can be fixed.

Cons

- It does not catch every accessibility problem.
- Some issues still need to be checked manually.
